THINK YOU MIGHT HAVE BEEN RECENTLY EXPOSED TO HIV?

**SEX WITHOUT
A CONDOM?**

**CONDOM BROKE
OR SLIPPED OFF?**

**SHARED INJECTING
EQUIPMENT?**

PEP (Post-Exposure Prophylaxis)
is a four week treatment that can prevent HIV.

**THE SOONER YOU START PEP THE BETTER,
BUT IT NEEDS TO BE WITHIN 72 HOURS OF EXPOSURE.**

For PEP information lines and where to get PEP in
your state or territory, and to learn more:

**WITHIN
72
HOURS**
